Our mission is to delve into the world of global universities, exploring their unique strengths in data analytics. We'll do this by utilizing data from the renowned Times Higher Education World University Rankings. Our **data** ourselves gaining a solid grasp of fundamental data analytics principles, crafting engaging graphs, and featuring meaningful dashboards using IBM Cognos Analytics. Through our efforts, we aim to not only evaluate but also bring to life the distinct data-driven abilities of these institutions, helping us understand their individual stories and contributions in this data-centric landscape.

Step-2: Brainstorm, Idea Listing and Grouping

Brainstorm

Write down any ideas that come to mind that address your problem statement.

 10 minutes

TIP
You can select a single row and fit the panel (match its width) or even its height to suit directly.

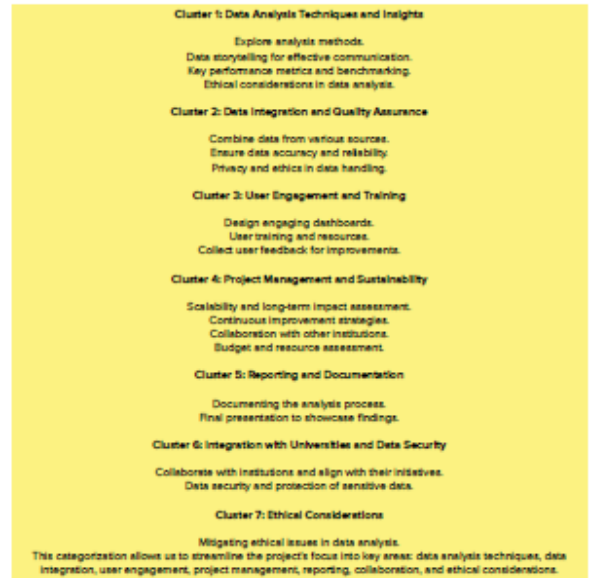

Group Ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Autism research helps us identify common traits to find, harness, organize, and recognize important ideas as theories within your mind.

Step-3: Idea Prioritization

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

Participants can use their cursors to point at whom they think should go on the grid. The facilitator can confirm the spot by using the laser pointer, holding the H key on the keyboard.

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

After you collaborate
